TO THE ABOVE:

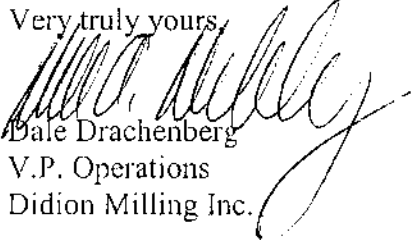

Didion Milling, Inc. and its associated company, Grand River Distribution, LLC (hereafter collectively "Didion"), are requesting that a parcel of land owned by Grand River Distribution, LLC in the Town of Courtland, that borders on Cabbage Road, be rezoned and approved as a site for an ethanol plant. Didion understands that if this project is approved, it would result in some additional traffic on a portion of Cabbage Road.

Accordingly, Didion, as a condition of the approval of this project, would commit to pay the full cost to upgrade the portion of Cabbage Road to accommodate the level of usage that would then be expected. We do not know whether this section of road is currently maintained solely by the Village of Cambria or whether this is a cost shared by the Village and the Town of Courtland.

The location of Cabbage Road, in this area, could be moved in a way that would reduce most of the traffic on this road that would be associated with this project. If there was an agreement to relocate a portion of Cabbage Road in this area, to reduce that traffic on this road, Didion likewise would agree to be responsible for the cost to do so along with applying for and applying any grants received for said relocation.

If you have any questions in regard to the matters covered in this letter, or any other aspect of this project, please let us know.

Very truly yours,

  
Dale Drachenberg
