

11/13/10

Village Board
Village of Cambria
Cambria, WI

Dear Board Members,

I see that the Village Board will be discussing possible fines to Didion Milling and Didion Ethanol for violations of the developers' agreement signed by both parties. I find it disturbing that Didion representatives will be allowed in the closed session to plea their case. They have no case. They did woefully violate that agreement and should be held accountable. If it were not for several dedicated citizens that only want to live in a community with clean air and water that these lawbreakers were held accountable. This company has complete disregard to the law and the community that facilitates their activities. They tried to undermine the citizens of Cambria by asking the state to settle their violations to avoid a loss in federal court and possibly lose federal contracts and the state agreed. That agreement also attempted to thwart citizen suits against Didions.

I ask that you take full advantage of your rights and hold them to the highest possible penalties. They have tried to use flawed ideas and laws to stop you but it is obvious that they have no case. Use this opportunity to pay for the increased costs we have accrued with the new fire station and upcoming costs to our infrastructure that they are partly responsible for. Stand up to these violators and do not cave in. I have watched this board in the past roll over. Stand tall, stand for the residents, and stand for integrity.

I am pleased and amazed that you have come this far and have not succumbed to their high priced attorneys, lobbyists and other intimidators.

Sincerely,

John Domino
Cambria, WI
